## SUMMARY

Full Stack Developer with 4 years building web platforms, apps, APIs and data services. I work on large-scale traffic monitoring, agribusiness, laboratory, healthcare and fintech products, from design to deployment and monitoring. I also run three products of my own, two of them live.

## EXPERIENCE

**Full Stack Developer · Sysout** 2024 – present

- Large-scale traffic monitoring: APIs, image capture and processing, an app for police forces and a web platform (Java, PHP, Python, PostgreSQL, Redis).
- Seed production management for agribusiness: integrated CRM, field operations, finance and planning modules.
- Clinic and hospital management (Java, Angular), lab management with an integrated web platform and app, and app features for a digital banking store (Flutter).
- Queues and async processing, system integrations, performance tuning, CI/CD on AWS with Docker, and monitoring in production.

**Full Stack Developer · CRIAR · Federal Institute of Goiás**

- Migrated an institutional mobile app to a web platform used across the institute, with Angular and Java.

## OWN PRODUCTS

**Kapi** appkapi.com.br
Personal finance manager with an AI financial mentor (Claude): projected-balance dashboard, credit cards and statements, budgets, goals and net-worth projection. Laravel, React, TypeScript, PostgreSQL.

**Amonita Edu** amonitaedu.com.br
Study platform for medical residency, public exams and university entrance exams, with spaced repetition, flashcards, a question bank and a smart schedule. Next.js.

**Pulso** coming soon to Google Play
Workout and nutrition app with an AI coach, plus a website and a web panel for personal trainers. Flutter, Laravel, React, PostgreSQL, Gemini, Firebase.

## EDUCATION

**B.Sc. in Information Systems · Federal Institute of Goiás** In progress
